Professional Summary

Computer Science and Artificial Intelligence graduate with solid understanding of cybersecurity fundamentals, networking, and enterprise IT infrastructure. Interested in SOC Tier 1 security operations, including security event monitoring, alert triage, and assisting in initial incident response and threat analysis. Possesses practical knowledge of Windows and Active Directory environments, network administration, and secure system configuration. Familiar with building and maintaining network infrastructure, configuring switches and firewalls, and applying defensive security practices. Basic working knowledge of endpoint protection technologies and SIEM platforms for security log analysis, anomaly detection, and proactive threat monitoring.

Core Technical Skills

- **Operating Systems:** Windows & Linux & server (installation, configuration, and maintenance)
- **Hardware Support:** Printers, scanners, and peripheral device setup and troubleshooting
- **Technical Troubleshooting:** PC hardware/software diagnostics, performance optimization, and system upgrades
- Strong foundation in **Network Fundamentals**, including OSI model analysis, subnetting, routing concepts, and VLAN configuration.
- Experienced in **Windows Administration and Active Directory management**, including user provisioning, Group Policy configuration, and domain services.
- Knowledgeable in **Network Security technologies**, including Firewalls, IDS/IPS, VPNs, Endpoint Detection & Response (EDR), and LDAP integration.
- Familiar with **Web Application Security and common client-side and server-side attack techniques**.
- Solid understanding of **Security Fundamentals and Cryptography principles**, including encryption, hashing, and authentication mechanisms.

- Basics in **SIEM platforms (Splunk & QRadar)** for log analysis, correlation, and threat detection.
- **Teamwork & Individual Work:** Ability to manage multiple tasks efficiently and perform under pressure
- **Communication:** Strong interpersonal skills with the ability to assist and train users at all levels
- **Languages:** Arabic (Native Proficiency), English (Fluent)

Experience & Activities

IT Lab Engineer – Egypt-Japan University of Science and Technology (E-JUST)
February 2025 – Present

- Manage and maintain **PCs and workstations** across multiple university labs.
- Install, configure, and update **software and hardware** used in teaching and research.
- Troubleshoot **technical issues** for students, teaching assistants, and faculty members.
- Administer **user accounts and applications** used in graduation projects.
- Oversee **small-scale networks** including switches, servers, and lab connectivity.
- Manage and secure the **Cybersecurity Lab**, including servers, switches, and client PCs used for simulations and exercises.

Retail Sales – Orange Company
August 2024 – February 2025

- Promoted and sold **Orange products and services**, including mobile lines, DSL connections, and internet packages.
- Guided customers in selecting suitable plans and resolving billing or product-related issues.
- Achieved monthly sales targets through effective communication and technical product knowledge.

Technical Support – Xceed Company (WE Account)
September 2023 – February 2024

- Provided **technical support** to ADSL and landline, connectivity and configuration.
- Diagnosed and corrected **routing and technical errors** during live calls.
- Assisted users with modem/router troubleshooting to restore service functionality.
- Maintained accurate call logs and contributed to high customer satisfaction scores.

Human Resources Member – MSP Helwan University
2019 – 2020

- Organized **technical and soft-skill sessions** for university students.
- Supported **team management and recruitment** for campus programs.

Education

- **Bachelor of Computer Science and Artificial Intelligence – Information Systems Department**
  Helwan University, Cairo, Egypt
  Sep 2019 – Jul 2023 | GPA 2.78 / 4.00
- **Graduation Project:** Mobile & Web Application for Attendance via QR Code Technology – *Grade A+ (94–100%)*
- **Cybersecurity Diploma – AMIT Learning:** Hands-on training in Networking, Windows/Linux Administration, Network Security, SIEM (Splunk, QRadar), Threat Intelligence, and Web Attacks. – **Louran, Alexandria**

Certificates

- **Human Resource (MSP)** – *Google Drive Link*
- **Network Security (Cisco, Coursera)** – *Certificate Link*
- **Introduction to Computers, Operating Systems & Security (Microsoft, Coursera)** – *Certificate Link*
- **Introduction to Cyber Attacks (NYU, Coursera)** – *Certificate Link*
- **Foundations of Cyber Security (Google, Coursera)** – *Certificate Link*
- **IT Help Desk for Beginners –** *LinkedIn Learning Certificate*
- **PowerShell Automation and Scripting** – *LinkedIn Learning Certificate*
- **Computer Network Fundamentals** – ***Certificate***
- **Implementation of Computer Network Fundamentals** – ***Certificate***
- **Introduction to Network Security** – ***Certificate***

Additional Information

- Interested in **Software Development**, **Cybersecurity**, and **Web Technologies**.
- Highly motivated to **learn new tools, frameworks, and technologies** to adapt quickly and deliver quality results.
- Knowledge of common **cyber-attack** techniques and mitigation strategies.
- Studying of **Penetration Testing** to know how **Attacks** done.
- Committed to **continuous self-improvement** and contributing effectively to organizational growth and success.
- Seeking a professional environment that promotes **innovation, collaboration, and skill development**.
- Available to join **after the required notice period**.
